Anton, 119

argument

 an array as, 13

arguments, 11

 in an array formula,
 7

array, 1, 4, 5, 18, 19,
21, 28, 31, 33, 37,
39, 41, 42, 43, 47,
61, 72, 110, 121

 as an operator to a
 formula, 13

 as argument to a
 function, 13

 basic concept, 1

 change the formula,
 19

 constant, 1

 create a two-
 dimensional, 8

 formula, 1

 one-dimensional
 horizontal, 2

 one-dimensional
 vertical array, 2

 range, 1

 ranges of formula, 2

 three-dimensional,
 2

 to create a
 horizontal, 8

 two types of, 7

 two-dimensional
 array, 2

 two-dimensional, 2
 vertical, 8

array constant, 7

 can be used with
 built-in Excel
 functions, 8

 create, 1

 create and use, 7

 delimit items in the,
 8

 horizontal, 8

 how to enter and
 edit, 1

 in memory, 7

- part of an array
 - formula, 7
 - to create, 7
 - to create a block of
 - horizontal and vertical, 10
 - to create a
 - horizontal, 8
 - to create a vertical, 9
 - two-dimensional, 10
 - vertical, 8, 9
- array formula
 - a single-cell
 - formula, 4
 - advantages, 19
 - arguments in an, 7
 - array constants
 - form part of an, 7
 - begins with an equal sign, 5
 - change the contents
 - of an individual cell, 6
 - consistency, 19
 - curly brackets, 2
 - delete an entire, 7
 - differ from single-value formula, 12
 - disadvantages, 7
 - disadvantages of, 6, 21
 - editing, 4
 - enter, 5
 - entering, 4
 - flexibility, 20
 - for the five cells, 13
 - how to enter and edit, 1
 - in a range of cells, 4
 - in a single cell, 4
 - in multiple cells, 4
 - insert blank cells, 7
 - is an executable
 - expression, 3
 - large, 6, 7, 21
 - mult-cell formula, 4
 - multi-cell, 7, 19
 - not documented, 21
 - perform an, 1
 - perform arrays
 - spreadsheet computations, 1
 - press
 - CTRL+SHIFT+ENTER, 6
 - replace a group of
 - formula with one, 12
 - safety, 19
 - set of constant, 7
 - smaller file sizes, 19
 - speed of
 - calculations, 6

- syntax, 5
- to compute the
 - product, 16
- to determine the
 - unit price, 17
- to shrink, 7
- type an, 4
- type or edit, 6
- uses a matrix
 - function, 4
- Array formulas. *See*
 - array formula
- array range, 7, 13
 - a rectangular
 - arrangement of cells, 11
 - edit an, 1
 - how to enter and edit, 1
- array results
 - how to calculate, 1
- arrays
 - application in solving linear equations, 27
- are rectangular
 - ranges of formulas or values, 3
- large amount of calculations, 3
- assumptions

- for solving the
 - problem, 90
- augmented matrices,
 - 65
 - to compute, 65

C

- calculations
 - large amount of, 3
- carbohydrates, 116
- cell, 22
 - how to name, 24
 - how you can name a, 24
- chemical substance,
 - 106
- Chu, 120
- Co, 119
- coefficient matrix, 58
 - has nonzero
 - determinant, 57
 - inverse of, 58
 - sample worksheet, 77
 - using Excel function, 58
- coefficients, 51
- computation
 - greater accuracy, 19
- computations
 - concerning linear systems, 50

- faster processing
 - during, 7
 - using matrices, 27
- compute A^{-1}
 - MINVERSE function, 77
- condos, 113
- conformable
 - appropriate number of rows and columns, 33
 - two matrices are, 33
- copper, 112
- copy and paste, 29
- Cramer's rule, 63
- Cramer's rule
 - to solve system of linear equations, 65
- CTRL+SHIFT+ENTER, 5
- curly brackets, 8
- current, 97
 - flowing into a junction, 97
- currents
 - for the electrical network, 101
 - unknown loop, 104

D

- data regression, 50

- $\det(A)$, 41
 - computing, 42
 - is defined only if, 41
 - use Excel to compute, 42
- determinant
 - is always a single value, 43
 - nonzero, 45, 47
 - not the elements of a matrix, 43
 - of a square matrix, 41
 - of matrix A, 41
- determinants, 27
 - of the augmented matrices, 66
 - solution of systems of equations, 27
- diabetic, 114
- Dietetic, 116

E

- Economy, 117
